IDENTIFIERS *Michigan

ABSTRACT

A summary of student enrollment data for Michigan's community and junior colleges is provided, covering the years 1988-89 and 1989-90. Introductory material describes the Community College Data Collection System which was initiated in 1988 to meet state and federal reporting needs and requirements. Each of the report's three main sections presents detailed graphs and charts, as well as a brief narrative overview of salient enrollment trends. The first section provides fall term data, including a 10-year history of the system as a whole, 1980-1990; a 10-year history by college, 1980-1990; enrollment by ethnicity and gender; non-credit enrollments by ethnicity and gender; first-time freshmen enrollment; and enrollment by gender, full-/part-time status, and age. In the second section, data on awards conferred are presented by level (i.e., certificate or degree); level and ethnicity; gender and program; and minority group and program. Finally, the third section offers year-end data, including total enrollment by gender, ethnicity, and college; total occupational enrollments by ethnicity; state board approved occupational enrollments by ethnicity and by gender and program; year end program enrollments by gender; and minority enrollments by program. FOREWORD

The Community College Data Collection System was initiated in 1988 to combine and modify reporting requirements for IPEDS, VEDS, and the Program Inventory. Each component of the system has been established on the Michigan Community College Computer Based Telecommunications System (CTS) and organized to improve date collection while meeting federal and state reporting needs and requirements. This modification has been to reflect occupational education as well as non-occupational activity at the program and college level.

The institutional data collection instruments are available in the form of spreadsheets via the Community College Telecommunication System (CTS). Each college must provide several types of information (completions, institutional, personnel, financial, physical plant, graduate follow-up), including student data. Enrollments are reported by ethnicity, level, status, age, and program. The data are collected by the Community College Services Unit, Higher Education Management Services, in October of each year. After editing, the data are entered into the Michigan Postsecondary Database System and forwarded to Washington D.C.

The Michigan Postsecondary Database System (MPEDS) is an aggregate of the data collected by the State of Michigan form all higher education institutions. The system allows for direct access to data and transfer of data to a wide spectrum of microcomputer applications/software. All community colleges within the State have access to the system and can independetly retrieve information to fulfill their individual as well as specialized needs. The data collected are often utilized by the Office of Civil Rights, the State Board of Education, The Michigan Department of Education, the Legislature, as well as various other State and Federal Agencies in economic and financial planning, manpower forecasting, and policy formulation.

This document is a compilation of summary student data for 1988-89 and 1989-1990. It is divided into three (3) sections: (1) Fall Term Enrollments, (2) Awards Conferred, and (3) Year-End Enrollments. Fall Term Enrollment figures reflect those students enrolled in a Michigan Community or Junior College as of the Federal reporting date of October 15 as mandated by the IPEDS (Integrated Postsecondary Education Data System) collection process or 1/10th of Fall Term. Awards Conferred and Year-End Enrollments are for the periods July 1988 through June 1989 and July 1989 through June 1990. The Classification of Instructional Programs (CIPCODES), established by the U. S. Department of Education, has been utilized for program comparative purposes.

Questions concerning any of the data may be directed to Rhonda P. Shechter, Higher Education Consultant, Community College Services Unit, Higher Education Management Services, at (517) 373-3362.

MICHIGAN COMMUNITY AND JUNIOR COLLEGE ENROLLMENTS
FALL TERM HISTORY

Michigan Community and Junior College credit enrollments gradually increased from 1980 (210,117) through 1983 (217,130). In 1984, however, they began to decline (206,827), resulting in a 4.75% decrease. This trend continued through 1985 when enrollments hit their lowest point (204,383) in the 11 year history. Although enrollments have increased gradually since 1986, this measure has not been significant.*

Fall Term 1990 was the first time that data was collected regarding students enrolled only in non-credit courses in order to get a more complete picture of total community and junior college enrollments. Since the reporting date was the Federally mandated October 15, 1990 or 1/10 of Fall Term, some colleges reported '0' [none] in this area since many students who enroll soley in non-credit courses register later in the term. Nonetheless, 15 colleges did report some type of non-credit enrollments, resulting in the addition of 14,149 students to the State of Michigan Fall Term community and junior college count (239,320).

Minority enrollments remained relatively constant from 1989 (30,625) to 1990 (29,448) [without the inclusion of Highland Park data]. The number of Asian enrollments increased by 135, Hispanics by 140, and Whites by 1,995. Race Unknown (not shown in the table but inferred by subtracting the counts of all races from total students) dropped by 897. As a percentage of the whole, however, all groups remained stable.

First-time freshmen dropped from 1989 (43,867) to 1990 (37,545), while the number of all other students increased, implying that more students are returning to community and junior colleges. The number of full-time students also has increased from 59,921 in 1989 to 60,001 in 1990, while the number of part-time has slightly dropped (165,345 to 165,170). The number of men decreased while the number of women enrolled increased from 1989 (98,957 men; 126,309 women) to 1990 (96,325 men; 128,346 women) with women still comprising the majority of the population (57%).

The largest group of students attending community and junior colleges are those from 18-20 years of age. In general, students in this age group are enrolled full time, while part-time students tend to tend to fall within the 21-25 age bracket.

***Even though Highland Park Community College did not report data, if it is assumed that enrollments remained constant, then Fall Term 1990 also demonstrated an increase.**

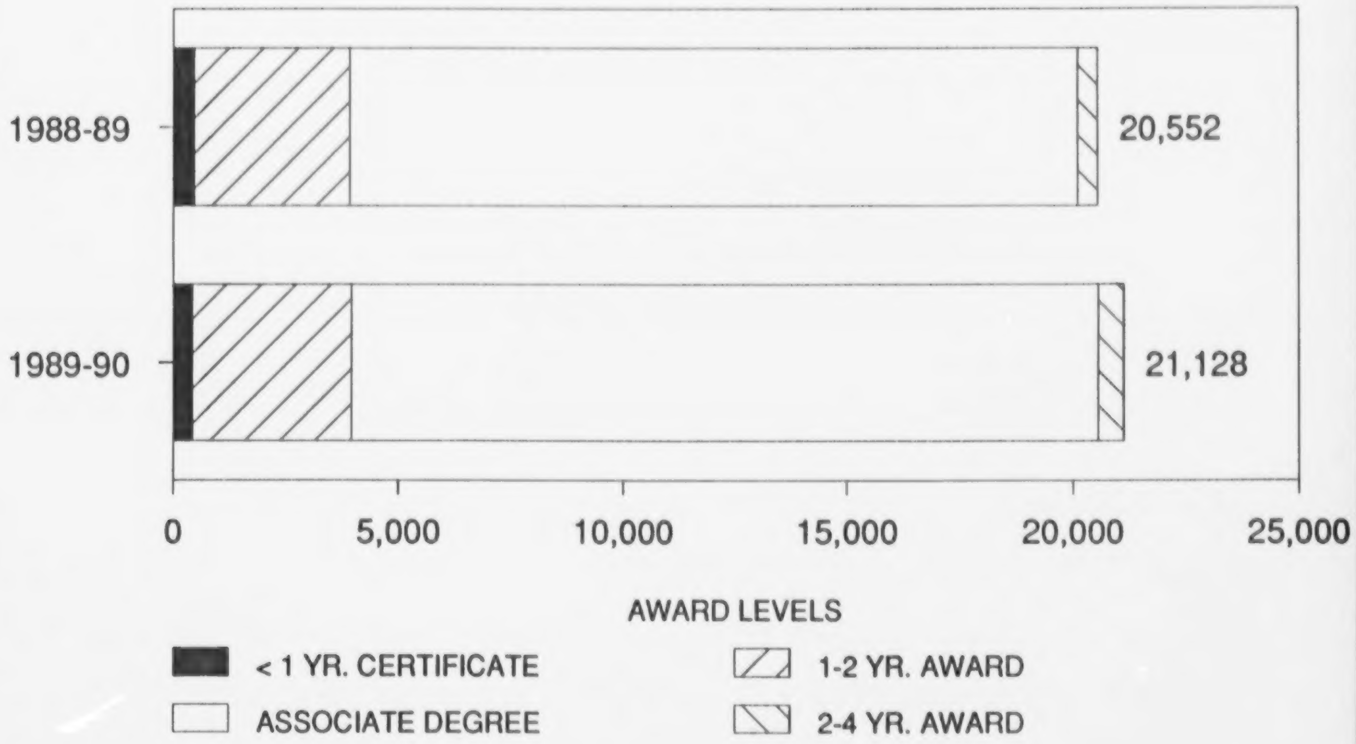
AWARDS CONFERRED

AWARDS CONFERRED BY LEVEL
JULY 1988-JUNE 1989; JULY 1989-JUNE 1990



NO DATA REPORTED BY HIGHLAND PARK FOR 1989-90.

AWARDS CONFERRED
JULY 1988-JUNE 1989 AND JULY 1989-JUNE 1990

Total awards conferred increased 2.80% from 1988-89 (20,552) to 1989-90 (21,128) [even without the inclusion of Highland Park Community College data]. Although the number of 'less than one year' certificates decreased from 473 in 1988-89 to 427 in 1989-90, all other awards demonstrated some type of increase. The largest percentage increase (27.15%) was in the number of 'greater than but less than 4 year' awards.

Liberal/General Studies was the program in which the greatest number of awards were conferred in both 1988-89 (3,702) and 1990-91 (4,190), along with Business Administration and Management - General (1,675; 1,602, respectively), and Nursing, General (1,643; 1,723, respectively). Awards were conferred in 312 programs in 1988-89 and 330 in 1989-90.

In 1988-89, no awards were conferred to women in the areas of Construction Trades (353), Aircraft Mechanics, Airframe (50), Automotive Body Repair (28), Industrial Equipment, Maintenance, and Repair (27), as well as Mechanics and Repairs (39). Women were the only ones who received awards in Secretarial and Related Programs (59), Executive Secretarial (101), Records Technician (40), Fashion Merchandising (26), and Vocational Home Economics (22).

In 1989-90, women were the recipients of awards in the such traditional female areas of Secretarial (89), Medical Assisting (84), Legal Secretary (77), Dental Assisting (65), and Child Care Aide (63), Dental Hygiene (160), Executive Secretary (103), and Medical Records Tech (35), while men dominanted the fields of Heat/Air/Refrigeration (23), Precision Metal Work - General (23), Civil Technology - Other (14), and Aeronautical Technology (13).

Awards conferred to minority students followed the general trend in both 1988-89 and 1989-90 with minorities receiving the greatest number of degrees/certificates in Liberal/General Studies, Nursing, and Business Administration and Management. Minority students received awards in 172 programs in 1988-89 and 180 in 1989-90. Some of the occupational programs in which awards were not conferred to minorities in either year include: Purchasing, Nuclear Medical Technology, Foster Care/Family Care, Educational Media Technology, Architectural Engineering, Civil Technoloyg, Nuclear Power Plant Operations Technology, Veterinarian Assisting, Electrical Technology, Water & Wastewater Technology, Aircraft Mechanics, Power Plant, Aeronautical Technology, Transportation Management, Energy Conservation & Use Technology, Material Handling, Computer Servicing Technology, Ultrasound Technology, and Cooling/Refrigeration.

***Highland Park Community College did not report figures for 1989-90.**

YEAR-END ENROLLMENTS

71/72.

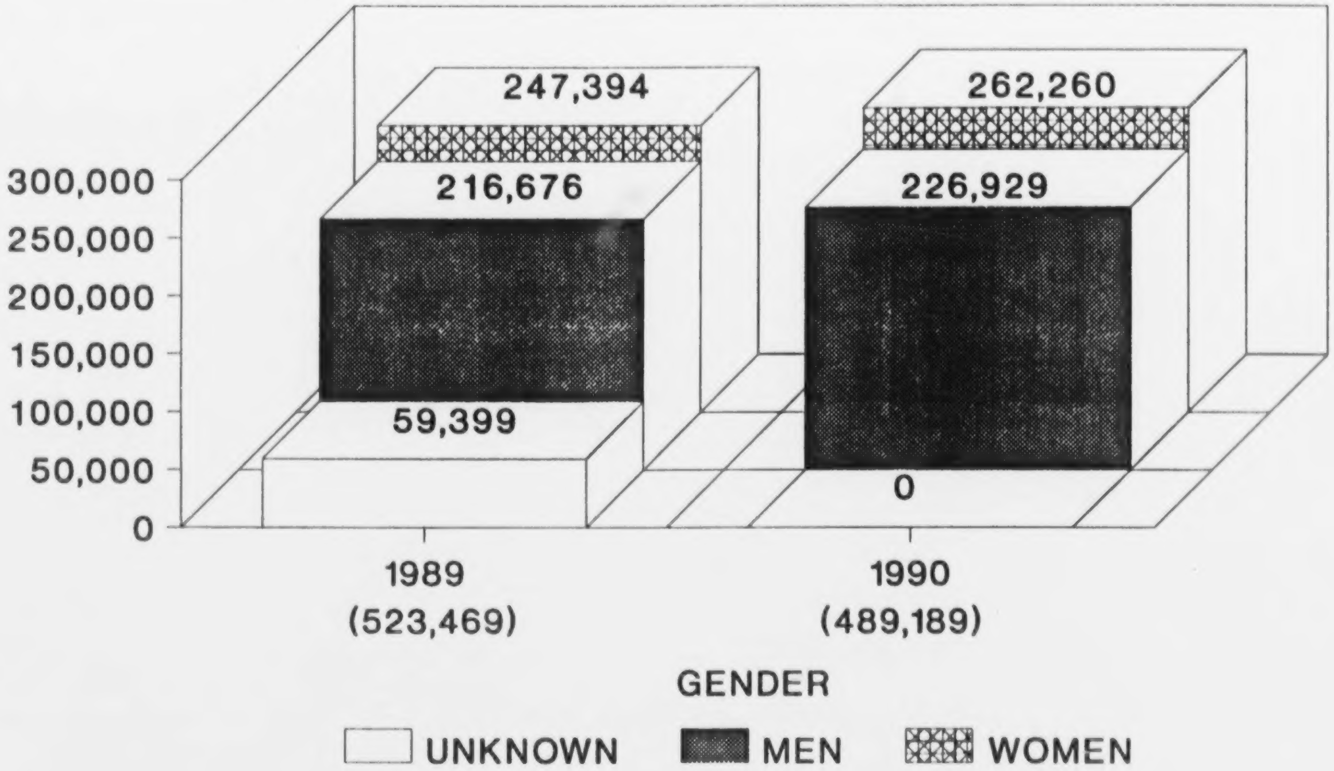
YEAR-END ENROLLMENTS
JULY 1988-JUNE 1989 and JULY 1989-JUNE 1990

Total Year-End Enrollments decreased from 523,469 in 1988-89 to 489,189 in 1989-90 (without the inclusion of Highland Park Community College data). Nonetheless, all minority groups increased to some extent, while the number of Whites and Unknowns declined.

Total occupational enrollments increased 12.04%, going from 179,518 in 1988-89 to 201,134 in 1989-90, while the number of those enrolled in State Board Approved programs also declined (103,758 and 96,699, respectively). Business Administration and Management - General (13,373; 11,300), Nursing - General (8,021; 7,054), as well as Accounting and Computing (6,109; 4,803) were State Board Approved Programs with the greatest number of enrollments; while Liberal/General Studies, Business and Administration and Management - General, and Nursing were the programs with the largest overall enrollments for both years. Similar to awards conferred, men dominanted such fields as Automotive Mechanics, Machine Tool Operation/Machine Shop, Automotive Technology, Industrial Technology, whereas women were the majority in such traditional fields as Nursing, Executive Secretarial, Child Care and Guidance Management, Dental Hygiene, and Word Processing. There were enrollments in 372 programs in 1988-89 and 386 in 1989-90.

Minority enrollments were greatest in Liberal/General Studies (12,160), Business Administration and Management - General (3,407), and Nursing (766) in 1988-89. This same trend continued into 1989-90 even though the number of minorities declined in Nursing (3,102) and Business Administration and Management - General (3,102). Liberal/General Studies, however, reflected an increase (17,453). Minority students were enrolled in 312 programs in both 1988-89 and 1989-90. No minority students were enrolled in the following occupational programs either year: Agricultural Production (General), Agribusiness & Agriproduction (Other), Agricultural Business, Civil Technologies (Other), Energy Conservation & Use Technoloyg, Parks and Recreation Management, Petroleum Technology, Occupational Safety & Health Technology, Physical Science Technologies (Other), Pipefitting & Steamfitting, Solar Heating & Cooling Technology, as well as Typing, General Office & Relation Programs, Other.

TOTAL YEAR-END ENROLLMENTS BY GENDER
1988-89 AND 1989-90



INCLUDES PROGRAM AND NON-PROGRAM SPECIFIC ENROLLMENTS.
1989-90 EXCLUDES HIGHLAND PARK DATA.

TOTAL YEAR-END ENROLLMENTS BY ETHNICITY*
1988-89
